Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: _____.

DETAILED ACTION

1. Claims 1-5, 12 and 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, lines 9-10, the recitation "after all XOR connections are traversed a result E" is indefinite as to what it means. Further, "2n-2", line 7, should be - 2n-1 --.

Appropriate correction is required.

As per claim 12, line 1, the recitation "a finite field multiplier according to claim 5" is indefinite. It should be according to claim 6.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto et al. (4,918,638).

Matsumoto et al. discloses in figures 1,5 and 7 a multiplication of first (P) and second (Q) elements of a Galois field $GF(2^n)$. The multiplication includes forming in an addition part (11) an intermediate result (R) of bit width $2n-1$, and processing the intermediate result Z in a reduction part (12) by modulo dividing by a polynomial (K) to produce a result (S) as claimed.

Art Unit: 2124

It is noted that Matsumoto et al. does not specifically disclose first and second input registers as claimed. However, since such input registers for loading input data to a processing device are well-known in the art. A person of ordinary skill in the art would have found it obvious to provide Matsumoto et al. with input registers as claimed in order to maintain the states of the input signals during processing and thus to reduce errors.

4. Claims 6-11 and 13-15 and 21 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (571) 272-3719. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
